

HOW TO MAKE AN INEXPENSIVE GARDEN

Seed-spacing Template

DIRECTIONS:

1. Remove the pegboard from the package and place it front-face up on a flat surface.
2. Using the markers, pick one color and make the main central mark on the board.
3. To mark the 2-inch holes, choose another color to mark every 2 holes, starting from the central mark and counting outward.
4. To mark the 3-inch holes, choose a third color to mark every 3 holes, starting from the central mark and counting outward.
5. To mark the 4-inch holes, choose a fourth color to mark every fourth hole, starting from the central mark and counting outward. This mark will overlap the 2-inch marks, so outline around the original color where the 4-inch marks go.
6. Since the board isn't quite big enough to include every 6 holes vertically or horizontally, mark the corners which are nearly 6 inches from the center to the corner.
7. If you would like to label the marks, you can do that with a pencil or marker.

INSTRUCTIONS FOR USE:

1. Place the template in the garden space where you are sowing seeds.
2. Look on the seed package to verify the seed spacing and depth of planting.
3. Mark the matching holes for the measurement you verified, poking all the way through to make a hole that matches the depth for planting.
4. Once the holes are made, drop in 1-2 seeds.
5. Remove the template and cover with soil. Water them in gently.

JOT® LARGE SQUARE PEG BOARD:

Color: White

Material: HIPS

Size: (W) 8.75 in x (H) 8.75 in x (D) 0.563 in
